RAHEELA INSTRUMENTS

# ATRAUMAIR FORCEPS

These Forceps, with parallel grasp on the neck of the tooth and deep reach in the alveolar region, provides a secure hold for the extraction of the tooth. All Atraumair forceps feature a matte finish for enhanced contrast and reduced light reflection. Unique hold design help reduce the weight of the forceps and provide an increased comfort and control. Following are key features of these,

- Unique hold design reduced weight of the forceps, providing increased comfort and control
- Matte finish for enhanced contrast and reduced light reflection
- Enhanced beak geometries and longitudinal beak serrations provides a firm, secure grasp of the crown and root reducing the risk of crushing or fracturing the tooth
- Laser marked hinge for greater visibility when bagged for sterilization
- Surgical Stainless Steel & Completely Sterilizable

# SOFT BRUSHING KIT

This kit is designed to extend the flap without the need for incision. The concept of this product is to disorganize the collagen fibers of the fibrous periosteum. This reduces the stiffness of the flap allowing the flap to release farther.

Set of 5 brushing Instruments

# BONE MORSELIZER

- Titanium Knurled Surfaces Grind Bone Fragments Into Smaller Particles For Grafting
- Place Harvested Bone In Well Of Instrument
- Apply Pressure And Turn "T" Handle
- Bone Is Morselized Between Knurled Titanium Surfaces
- Push "T" Handle To Remove Bone From Instrument
- Recommended for grinding small pieces of bone
- Cylinder Diameter is 16mm

**RI-1181**  
Bone Morselizer  
Ø inside 16mm, Lenght 17cm

RAHEELA INSTRUMENTS

- The bone mill allows fast and easy grinding of bone blocks into smaller bone chips
- The bone mill grinds bone into very fine particle size chips which collect in an easy to use cylinder
- The grinding cylinder is a high grade stainless steel with sharp cutting edges

Remove the top, insert the bone into the body of the bone mill, replace the top and continued to applied downward pressure while turning the handle to grind the bone.

A dental explorer or sickle probe is an instrument in dentistry commonly used in the dental armamentarium. A sharp point at the end of the explorer is used to enhance tactile sensation.

D5 Explorer, Double Ended

11/12 Old Dominion University Explorer, DE

Large diameter handle 9.5mm is used for all explorers. The thin, unbreakable, yet flexible tips from a special steel alloy guarantee an extremely long life. This section includes the most commonly used diagnostic explorers. All explorers are,

Made from Stainless Steel Material  
Ultrasound Resistant &  
Completely Sterilizable

These are double-ended instruments with an explorer on one end and a probe on the other end. An Expro is excellent for dental examinations and charting. This section includes the most commonly used Expros. These are,

Made from Stainless Steel Material  
Ultrasound Resistant &  
Completely Sterilizable  
Color Coded

RAHEELA INSTRUMENTS

RAHEELA INSTRUMENTS

# SCALERS

Clinical probing depths and measurements of attachment loss obtained with periodontal probes are a practical and important method of determining a patient's periodontal status. When selecting a probe for measuring pocket depth, you should consider selecting a probe that has markings that you are familiar with. This section includes the most commonly used Probes.

Stainless Steel Material  
Ultrasound Resistant  
completely Sterilizable

The thin, unbreakable, yet flexible tips from a special steel alloy guarantee an extremely long life. All our Periodontal probes are prepared by a high-speed cutting machine. Working parts are in very fine to very precise dimensions and the color markings are (do not dissolve or fade off) ultrasound-resistant.

2N Color-Coded Nabers  
Furcation Probe, 3-6-9-12, DE

### H6/H7 Hygienist Anterior Sickle Scaler

Super-thin, contra-angle design.  
Very effective for interproximal areas.  
Shank angulation provides accessibility to all anterior and premolar surfaces.  
Made with stronger and longer-lasting Stainless Steel

### SYG7/8 Younger Good Universal Curette

Blade designed with two cutting edges and a rounded toe for use on all surfaces.  
Particularly use for the removal of supragingival / subgingival calculus.  
Stainless steel  
Completely sterilizable  
Super-durable to stay sharper longer.

RAHEELA INSTRUMENTS

RAHEELA INSTRUMENTS

# SCALERS

## Gracy Curettes

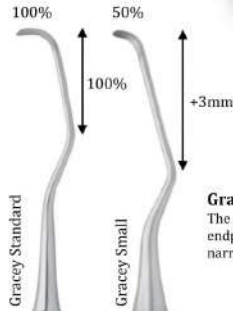

RAHEELA INSTRUMENTS

# SCALERS

In the following chart you can find the exact application areas for the various Gracey Curettes.

### Gracey Curettes - Small

The terminal shank of the Gracey curette Small is 3mm longer and the work endpieces are 50% shorter. This modification allows better access to the narrow root surfaces.

Posterior Columbia Universal Curette blade designed with two cutting edges and a rounded toe for use on all surfaces. Use for the side tooth area.

RAHEELA INSTRUMENTS

## SCALERS

### Langer Universal Curettes

The Langer Curette design combines the benefits of a Universal Curette blade, and the shank designs of area specific Curettes. A Universal blade allows Instrumentation on both the Mesial and Distal surfaces with one Instrument.

### McCall Universal Curettes

Pointed McCall Curette designed for the removal of supragingival calculus  
 McCall scalers have tapered, pointed working ends and are highly suitable for interdental cavities.  
 Made from surgical grade stainless steel.  
 Large diameter handle design, 9.5mm  
 Completely sterilizable  
 Super-durable to stay sharper longer.
